Obstetric Care Agreement

Patient's Full Name: _____ **Date of Birth:** _____

Date: _____

You can expect to be seen for prenatal visits on a monthly basis up until 28 weeks gestation, seen every 2 weeks from 28 to 36 weeks gestation, and seen weekly from 36 weeks gestation until delivery. You can also expect to be seen for a post partum visit approximately 6 weeks after delivery. If your condition dictates, you may be referred to another provider for specialty care.

If you have private insurance, you can expect to be billed after your delivery for your prenatal and post partum care in a lump sum. If you have Medicaid or Dena'ina insurance, you are being accepted as a patient for obstetric care only, and will not be seen at Upstream Family Medicine for primary care unless you have already been accepted as a primary care patient.
